Why this project exists

How this took form

This project exists because technology and graphic design are intertwined. Design follows the broad technological advancements. This is true for most professions and disciplines

This project exists because technology and graphic design are intertwined. Design follows the broad technological advancements. This is true for most professions and disciplines

Dominant technology and media platform have an enormous impact on all parts of society. Their competition, in an almost completely, de- or unregulated market, drives

Information and its circumstances are changing. This can mean two The Crisis of things. The two Information different meanings are connected to each other, but This is difficult to read should for clarity's sake remain it was difficult to make separated This is the product of my process and its complexity is a reflection of my struggle to navigate and fully understand the topic at hand Firstly, the digital Secondly, revolution. Of course! this eerie feeling of not knowing up from down, truth from false or I choose to not reduce, but instead whether it's ai or not emphasize the nuance, detail and complexity. Or the brain rot after This was no easy choice. you accidentally spent an entire evening on Designers learn to reduce Simplicity, efficiency and Perhaps, if I allow minimalism are the goal myself broader strokes, that people *and* politicians are turning opinions into facts, that Designers learn to reduce fascism and rampant Simplicity, efficiency and neo-liberalism are minimalism are the goal dominating world politics. This is not about isms. It does not have to be this way Although it really is Minimalism is not given about the worst kind of isms – it it not about isms. Across the world Designers design with different parameters and ideals in mind Japanese graphic design, like signage, web pages are not nearly as minimal as ones in the west In general Japanese merchants add and keep very much information for potential customers to see Price, calories, origin, maker – for each dish shown on the menu

Information has seen

before the digital one

profound changes

New technologies bring

new norms, new ways

of living.

Technology in this

sense is a tool that

things they did before

- but faster and more

helps humans do

efficiently.

Naomi Alderman

Information Crisis

The Third

Information has seen

before the digital one

profound changes

Graphic designers do this all the time

In fact, the act of writing is basically this in and of itself

This is the very nature of graphic design

The designers use and make symbols, that on their own represent something else: Logotypes, icons, letters,

This is why digital design is especially... precarious, slippery

But unlike houses, furniture, roads, or clothing...

Digital design is inherently based on

metaphors, illustrations and abstractions.

Digital design is inherently based on metaphors, illustrations and abstractions.

Because the technology behind the internet – behind social media, streaming, searching and so on – is so unbelievably complex, metaphors are inevitable.

Caps Lock Ruben Pater

As time passes, we tend to

stop thinking of them as

symbols. They just 'are'.

maps, illustrations

Without metaphors, many things become completely incomprehensible. The internet, if thought of as just cables and programming, is impossible to fathom and becomes uninteresting.

The graphic designer can make sense of clutter and large, complicated chunks of information, shaping it into something that is comprehensible

To do this successfully,

Designers also develop skills in understanding subtle, social differences and meanings in different symbols and abstractions

This makes them particularly good at choosing fonts, colors, shapes, tools and methods, given specific scenarios or contexts.

Essentially, this is 'style'.

With new perspectives,

Ornament and Crime

Dieter Rams

as possible

these ways of designing can

be redefined.

'As little design

Adolf Loos

Literally anything else,

handwriting, printing

Everything anyone interact

with in my every day life

is the product of design.

metaphors

There was design

before Modernism, there was...

became dominant and high status

The Grid The Grotesque

The simplicity
